

CORMORAN BIG TROUT

SPECIAL RANGE FOR TROUT
FISHING AT LAKES AND PONDS

SBIROLINO

Slim, slowly sinking Sbirolino with milky transparent body, which avoids dazzling. The Sbirolino appears invisible against the water surface.

Art.-No.	wt.	
79-62010	10.0	
79-62012	12.0	
79-62015	15.0	
79-62020	20.0	
79-62025	25.0	
79-62030	30.0	

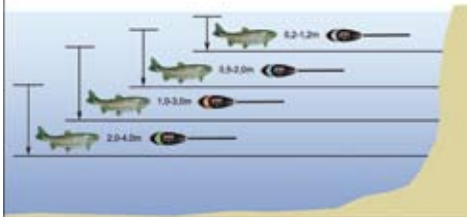

Content: 1 pcs.

Slim, slowly sinking Sbirolino with transparent body, which features almost invisible gliding of the Sbirolino. The different weights enable fishing at different water layers. Therefore a successful fishing at the pelagic zone is possible.

Art.-No.	wt.	
79-63010	10.0	
79-63012	12.0	
79-63015	15.0	
79-63020	20.0	
79-63025	25.0	
79-63030	30.0	

Content: 1 pcs.

BOMBARDAS

Special designed for trout fishing in defined diving depths

We developed 4 models with each individual weight and color code, which feature different diving depths:
grey diving depth 0.2-1.2m
blue diving depth 0.5-2.0m
red diving depth 1.0-3.0m
green diving depth 2.0-4.0m

Strategy:

If you know in what depth the trouts hide, just mount the matching Bombarda and off you go! If the position of the trouts is uncertain, start with the upper water layer and grope down step by step until you find the fishes. The color code and the preset diving depth make it easy to present the bait in the desired water layer.

Some hints:

Retrieve as slowly as possible. Make short retrieve stops under all circumstances. While the bait dwindles down slowly, it is attacked. When fishes are lazy retrieve with uniform up and down moves of the rod tip, to provide the bait with additional movement stimuli.

Fishing technique:

At fishing with the BIG TROUT Bombardas, you should orient the rod at 45 degrees up. Always keep a look on the line between water surface and rod tip. Soft bites can very often not be felt in the rod tip, but can be detected, when the „line belly“ is monitored considerably. When the bait is attacked, open the bail or activate the bite n' run mechanism. When the fish pulls off line, close the bail and set the hook.

grey diving depth 0.2-1.2m

TREMATROTAS

Trematrotas are special designed Bombardas without tube for ultra-slow fishing on shorter distances. Especially successful, if fished with slow up and down movements of the rod tip according to the Tremarella method.

Trematrotas Type 1 – slowly sinking

For active fishing straight below the surface. Leader: 120cm.

Trematrotas Type 2 – fast sinking

For active fishing in deeper water layers. Leader: 120cm.

Trematrotas Type 3 – floating

For active fishing on the surface. Leader: 120cm.

This swimming Trematrotas is also perfectly suited for surface fishing in combination with easy use floaters. Leader: 200cm.

Trematrotas Type 1 – slowly sinking

NEW

VETRINI GHOST

NEW

Available als short Vetrini Ghost or long Vetrini Ghost „slim“. BIG TROUT Vetrini Ghost are transparent sinkers, which are nearly invisible for the fish, and therefore perfectly applicable for following rigs:

Perfect for fishing with trout float rigging

BIG TROUT float, Vetrini Ghost “short” or “slim”, Sbirolino-stopper and BIG TROUT triple swivel. (Loop on loop conjunction is also possible). Leader: 60-80cm. Just cast the rig and wait till the bait sinks down.

Perfect for trout fishing without float Rigging

BIG TROUT Vetrini Ghost “Short” or “Slim”, Sbirolino-stopper and a BIG TROUT triple swivel.

In contrast to float fishing, you have a direct bait-contact with this rig. Perfect for tricky trouts. The BIG TROUT Vetrini Ghost is slowly sinking and provides a better and more life-like natural fall of your bait.

Vetrini Ghost short. Cont: 3pcs

Art-No.	wt.	
79-69003	3.0	
79-69004	4.0	
79-69005	5.0	
79-69006	6.0	

Vetrini Ghost slim. Cont: 3pcs

Art-No.	wt.	
79-69013	3.0	
79-69014	4.0	
79-69015	5.0	
79-69016	6.0	

Hint: Not only for active retrieve style fishing but also very well suitable for static float and ground fishing.

TROTA HÖLZL

NEW

The Trota Hölzl has been developed for slow retrieve near the bottom. Thanks to the high buoyancy the Trota Hölzl is standing upright and goes up at the slightest pull. Important: Always keep the line under tension – especially during the sinking phase. Normally trouts attack during the retrieve, but attacks during the fall are possible as well. The perfect trout rod features a sensitive tip, which is kept parallel to the bank in order to detect even softest bites. Once the bait is attacked, turn the rod in fish-direction and open the bail or better: use a small free spool reel. Wait with the hooking until the fish pulls line off.

Rigging: BIG TROUT Trota Hölzl, Sbirolino-stopper and BIG TROUT triple swivel. Leader: 120cm with split shot ca. 30-50cm in front of the bait. Floating baits are perfect.

Art-No.	wt.	
79-64110	10.0g	
79-64120	20.0g	

Content: 1 pcs.

CORMORAN BIG TROUT

TROTA TA TROUT FLOATS

NEW

Excellent manufactured trout floats, especially developed for pond fishing. Recent insights and experiences as well as state-of-the-art manufacturing techniques have led to the development of perfect calibrated floats with smallest tolerances.

TROTA TA10 DISTANCE FLOAT

Super long cast trout inline float for medium to long distances. Especially at wavy waters this float is unbeatable, since it bounces like a buoy - therefore providing a very attractive bait presentation. Since the TROTA TA10 drifts very easy, wide water areas can be covered. The pre-loaded TROTA TA10 additionally can be loaded with a BIG TROUT Vetrini Ghost to achieve faster sinking of the bait. Alternatively you can provide extra buoyancy for your bait by using a BIG TROUT Floater, which should be rigged 30-50cm in front of the bait.

Rigging:

The depth is adjusted with a Sbirolino-stopper, which is mounted above the float on the main line. On top of the BIG TROUT triple swivel another Sbirolino-stopper is mounted for secured knot protection.

Art.-No.	size g
79-65006	6+2
79-65008	8+2
79-65010	12+2
79-65015	15+2
79-65020	20+2

Content: 1 pcs.

TROTA TA11 DISTANCE FLOAT

Float for tricky conditions. Heavy pre-loaded long cast trout inline float for long distance fishing. By using the illustrated rig, the bait dwindles down super slowly and naturally and seduces even tricky trouts (under tough conditions just use one single maggot).

Rigging:

The depth is adjusted with a Sbirolino-stopper, which is mounted above the float on the main line. On top of the BIG TROUT triple swivel another Sbirolino-stopper is installed for knot protection. Leader: 2m-3m, ø0.16mm up to ø0.20mm.

The fishing technique is simple:

- 1.) Cast the rig (strong rod up to 40g casting weight) and let the bait sink. Even at light wind the float drifts over the lake and covers big areas.
- 2.) If fishes are spotted very remote, cast over the spot and retrieve the bait slowly to the spotted fish. As soon as a trout pulls the heavy float under water, you can set the hook. If you use the same technique for shorter distances, the TROTA TA15 Trout Wagglers is the right choice.

Art.-No.	size g
79-65110	10+2
79-65115	15+2
79-65120	20+2

Content: 1 pcs.

TROTA-TA 12 TROUT FLOAT

Trout float especially developed for the use of star lights, which is visible even at diffuse conditions or twilight. Specially designed for the prevention of line tangling at long distance casts.

Rigging:

For fishing for tricky trouts, you should use a transparent BIG TROUT Vetrini Ghost ("short" or "slim") as sinker, which is mounted between 2 Sbirolino-stoppers. You can also use 2 Vetrini Ghost in tandem to achieve the necessary weight, or use lead for less suspicious trouts. In any case you should use a BIG TROUT triple swivel to reduce line twist to a minimum.

Fishing technique:

Classic trout float for active float fishing near the shore and for static float fishing.

Art.-No.	size g
79-65204	4.0
79-65206	6.0
79-65208	8.0

Content: 1 pcs.

TROTA-TA 13 TROUT FLOAT

Classic inline trout float with special sliding mechanism. The line enters the float body central and leaves it lateral at the lower float body.

Rigging:

For fishing for tricky trouts, you should use a transparent BIG TROUT Vetrini Ghost ("short" or "slim") as sinker, which is mounted between 2 Sbirolino-stoppers. You can also use 2 Vetrini Ghost in tandem to achieve the necessary weight, or use lead for less suspicious trouts. In any case you should use a BIG TROUT triple swivel to reduce line twist to a minimum.

Fishing technique:

If this float is fished with uniform up and down movements of the rod tip while retrieving according to the Tremarella method, the bait achieves a teasing action thanks to the special float sliding mechanism.

Art.-No.	size g
79-65303	3.0
79-65304	4.0
79-65306	6.0
79-65308	8.0

Content: 1 pcs.

TROTA-TA 14 TROUT FLOAT

Particular „catchy“ inline trout float with special sliding mechanism. The line enters the float body central and leaves it lateral at the lower body part.

Rigging:

For fishing for tricky trouts, you should use a transparent BIG TROUT Vetrini Ghost (“short” or “slim”) as sinker, which is mounted between 2 Sbirolino-stoppers. You can also use 2 Vetrini Ghost in tandem to achieve the necessary weight, or use lead for less suspicious trouts. In any case you should use a BIG TROUT triple swivel to reduce line twist to a minimum.

Fishing technique:

Thanks to the low centre of gravity, the TROTA TA14 stands firm in the water even at windy conditions. Slow and uniform retrieving, combined with up and down movements of the rod tip activate even lazy trouts.

Art.-No.	size g	
79-65403	3.0	
79-65404	4.0	
79-65405	5.0	

Content: 1 pcs.

TROTA-TA 15 TROUT WAGGLER

Pre-loaded Trout Waggler especially for a very slow sinking bait presentation, to activate and provoke particularly lazy trouts. If horizontally presented baits are not the road to success, you should use the TROTA TA15 Trout Waggler in order to present your bait vertically. This often leads to success.

Rigging:

Fished without additional sinkers. Only a Sbirolino-stopper is mounted above the BIG TROUT triple swivel for the protection of the knot.

Fishing technique:

Cast over the hot spot, and retrieve the bait slowly over the spot. Since the TROTA TA15 is not designed for additional load, the hook bait slowly dwindles down and gets inhaled very fast. First of all big trouts are caught with this method.

Art.-No.	size g	
79-65502	2+2	
79-65504	4+2	
79-65506	6+2	

Content: 1 pcs.

TROTA TA16 PEACOCK-STICK

Super slim trout float, which lands without noticeable splash and glides through the water with almost no resistance. Because of the high buoyancy despite the small shape, long distance casts are possible. The two ends are colored differently, enabling the use of the brighter one as bite indicator according to the light conditions.

Rigging:

For fishing for tricky trouts, you should use a transparent BIG TROUT Vetrini Ghost (“short” or “slim”) as sinker, which is mounted between 2 Sbirolino-stoppers. You can also use 2 Vetrini Ghost in tandem to achieve the necessary weight, or use lead for less suspicious trouts. In any case you should use a BIG TROUT triple swivel to reduce line twist to a minimum. Leader: 60-80cm. Different retrieve speeds and occasional stops are the key to success.

CORMORAN BIG TROUT

TROTA-F TROUT FLOATS

Affordable trout floats made of balsawood for beginners, occasional anglers and price-conscious fishermen. Despite the cheap price the TROTA-F floats are excellent designed and very well processed. The dull black finish protects the balsawood body from water absorption. All parts are glued tightly.

TROTA-F1 TROUT FLOAT

The classic trout pole float for dynamic and static trout fishing techniques. Features good casting characteristics and provides the proper buoyancy to present also large baits. Very good visible thanks to the thick antenna.

TROUT TRIPLE SWIVEL

Line twist is a tiresome topic at trout fishing, which can't be avoided totally. When fishing without swivel, you almost can see, how the line twists more and more until casting is nearly impossible. Line twist cannot be prevented entirely, but one can minimize its disturbing influence to a minimum. The crucial role plays the swivel. We produce our BIG TROUT triple swivels (available with or without snap) on the latest machines with extreme low tolerances to provide a smooth running rotation. The 3 sizes cover all sorts of trout fishing techniques.

CORMORAN BIG TROUT

BIG TROUT SNELLED HOOKS **NEW**

Especially made for trout fishing. The newly developed, chemically sharpened hooks feature an extreme sharp and durable hook tip, for fast intrusion. Particular barbs support the fast intrusion and guarantee a secure hooking. All BIG TROUT snelled hooks are made of Hi-Carbon steel. A newly developed hardening procedure, which also excels our CGS hooks increases the distortion proofness as well as the strain resistance. The hook tip is still sharp after several catches. The BIG TROUT snelled hooks are processed by hand, every knot is security inspected.
